

Staffing meaning:

Staffing is that part of management concerned with obtaining, utilizing, and maintaining capable people to fill all positions in the organization from top level to bottom level. It involves the scientific and systematic procurement, allocation, utilization, conservation, and development of human resources. It is the art of acquiring, developing, and maintaining a satisfactory and satisfied workforce. Staffing is that function by which a manager builds an organization through the recruitment, selection, and development of the individual, which also includes a series of activities. It ensures that the organization has the right number of people and the right kind of people at the right places, at the right time, and performing the right thing.

Definition:

“The managerial function of staffing involves manning the organizational structure through the proper and effective selection, appraisal, and development of personnel to fill roles designed into the structure.”-*Koontz and O’ Donell*

Features of Staffing

Following are the features of staffing:

- **Staffing is an integral part of management:** Staffing is an integral part of management because an organization cannot exist without human resources.
- **Pervasive:** It is pervasive because staffing is performed by all managers at all levels and in every department.
- **Continuous Process:** Staffing is a continuous process because it continues throughout the life of the organization. It is required to meet the growing needs of an organization.
- **Deals with human being:** Staffing deals with people because it is concerned with the people at work and their relationships.
- **Wide scope:** Staffing has a wide scope because it includes a series of activities, like workforce planning, recruitment, selection, and training.
- **Multiple objective activity:** It is a multiple objective activity because it has to fulfill its responsibility towards the organization, employees and society.

Importance of Staffing

- **Filling job with competent personnel:** Staffing involves proper arrangement of people through proper recruitment and selection process. It helps with obtaining competent staff for various jobs.
- **Better performance:** The performance of an organization depends on the quality of persons employed in the organization. The function of staffing is significant because it ensures higher performance by putting the right person in the right job at the right time.
- **Survival and growth:** Staffing is a very important function of management in comparison to other functions because all the functions of an organization are performed by the people. Competent and efficient workers bring an organization into existence and ensure its survival and growth.
- **Optimum utilization of human resources:** The staffing process helps to ensure optimum use of human resources by avoiding overstaffing. It prevents the underutilization of personnel and higher labor cost. It also helps in avoiding disruption of work by indicating in advance the shortage of personnel.
- **Improve job satisfaction and morale:** Proper staffing improves job satisfaction and morale of employees through objective assessment and fair rewarding for their contribution. It provides the right kind of work atmosphere and culture to employees.

Process of Staffing: The steps involved in the staffing process are as follows:

- HR Planning
- Recruitment
- Selection of candidates
- Placement and Training
- Development
- Promotion
- Appraisal
- Determination of Remuneration

Principles of staffing

- **Principle of the objective of staffing:**

The objective of managerial staffing is to ensure that organization roles are filled by those qualified personnel who are able and willing to occupy them.

- **Principle of staffing:**

This principle rests on an important body of knowledge concerning management practices. Those organizations that have no established job definition, no effective appraisals, and no system for training and development will have to rely on coincidence or sources to fill the positions with able managers.

- **Principle of job definition:**

Since organizational roles are occupied by people with different needs, these roles must have many dimensions such as pay, status, power, discretion that induce managers to perform.

- **Principle of managerial appraisal:**

The more clearly verifiable objectives and required managerial activities are identified, the more precise can be the appraisal of managers against these criteria.

- **Principle of open competition:**

The more an enterprise is committed to the assurance of quality management, the more it will encourage open competition among all candidates for management positions.

- **Principle of management training and development:**

The more management training and development are integrated with the management process and enterprise objectives, the more effective the development programs and activities will be.

- **Principle of training objectives:**

The more precisely the training objectives are stated, the more likely are the chances of achieving them. The analysis of training needs is the basis for training objectives that give direction to development and facilitate the measurement of the training efforts.

- **Principle of continuing development:**

The more an enterprise is committed to managerial excellence, the more it requires that managers practice continuing self development. This principle suggests that in a fast changing and competitive environment, managers cannot stop learning. Instead, they have to update their managerial knowledge continuously, reevaluate their approaches to managing, and improve their managerial skills and performance to achieve enterprise objectives.

Directing: Meaning

Directing is the heart of management function. All other functions of management such as planning, organizing, and staffing have no importance without directing. Leadership, motivation, supervision, communication are various aspects of directing.

Directing

Directing refers to a process or technique of instructing, guiding, inspiring, counselling, overseeing and leading people towards the accomplishment of organizational goals. It is a continuous managerial process that goes on throughout the life of the organization. Main **characteristics** of Directing are as follows:

1. Initiates Action

A directing function is performed by the managers along with planning, staffing, organizing and controlling in order to discharge their duties in the organization. While other functions prepare a platform for action, directing initiates action.

2. Pervasive Function

Directing takes place at every level of the organization. Wherever there is a superior-subordinate relationship, directing exists as every manager provides guidance and inspiration to his subordinates.

4. Continuous Activity

It is a continuous function as it continues throughout the life of organization irrespective of the changes in the managers or employees.

5. Descending Order of Hierarchy

Directing flows from a top level of management to the bottom level. Every manager exercises this function on his immediate subordinate.

6. Human Factor

Since all employees are different and behave differently in different situations, it becomes important for the managers to tackle the situations appropriately. Thus, directing is a significant function that gets the work done by the employees and increases the growth of the organization.

Significance of Directing:

1. Initiates Action: Each and every action in an organization is initiated only through directing. The managers direct the subordinates about what to do, how to do when to do and also see to it that their instructions are properly followed.

2. Integrates Efforts

Directing integrates the efforts of all the employees and departments through persuasive leadership and effective communication towards the accomplishment of organizational goals.

3. Motivates Employees

A manager identifies the potential and abilities of its subordinates and helps them to give their best. He also motivates them by offering them financial and non-financial incentives to improve their performance.

4. Provides Stability

Stability is significant in the growth of any organization. Effective directing develops co-operation and commitment among the employees and creates a balance among various departments and groups.

5. Coping up with the Changes

Employees have a tendency to resist any kind of change in the organization. But, adapting the environmental changes is necessary for the growth of the organization. A manager through motivation, proper communication and leadership can make the employees understand the nature and contents of change and also the positive aftermaths of the change. This will help in a smooth adaptation of the changes without any friction between the management and employees.

6. Effective Utilization of Resources

It involves defining the duties and responsibilities of every subordinate clearly thereby avoiding wastages, duplication of efforts, etc. and utilizing the resources of men, machine, materials, and money in the maximum possible way. It helps in reducing costs and increasing profits.

Technique of Directing

Direction in the organization is to be implemented in a methodical way. Various Techniques are used that prove good when used as Direction in the organization.

Let us now discuss the various techniques used in the process of Direction:

1. Consultative Direction: Here the superiors in the organization system consults the decisions with their subordinates or team members, before implementing it or putting it into action.

2. Free-Rein Direction: In this type of Direction, the educated and experienced subordinates take decisions on their own. Decisions are relied on and they also take the accountability of the decision.

3. Autocratic Direction: Here the superior clearly sets the directions and gives precise orders to the subordinates to accomplish a predetermined goal. He does not take the suggestions or viewpoints of the subordinates.

4. Supervision: Supervision is only overseeing the subordinates at work. He gives a clear-cut instruction about the work. Skills, group togetherness and coordination affect the direction of supervision.

5. Motivation: In this type, the direction does not only limit till giving orders or instructions, it is rather a force that creates a burning desire among the subordinates to perform the task. Motivation is the driving energy that keeps the subordinates interested in the work, this can also be fulfilled by offering them incentives.

Meaning of Motivation

Motivation is the process of stimulating people to action to accomplish desired goals. Motivation is a managerial function which has been defined by different scholars. Some of the important definitions are as follows:

According to **Edwin B. Flippo**, “*Motivation is the process of attempting to influence others to do your will through the possibility of gain or reward.*”

According to **William G. Scout**, “*Motivation means a process of stimulating people to action to accomplish desired goals*”.

Nature of Motivation

1. Motivation is an internal feeling which influences the human behavior.
2. Motivation is affected by way the individual is motivated.

3. Motivation results in achieving goals positively in the organization.
4. Motivation is related to satisfaction.
5. Motivation can be positive and negative.
6. Motivation is a complex process as the individuals are heterogeneous in their expectations, perceptions and reactions.
7. Motivation is stronger when it springs from a person's needs which are consistent with his values.

3. Importance of Motivation

1. It helps the manager to ignite the will to work amongst the workmen.
2. Good motivation method helps in improving the abilities and capabilities of the employees.
3. It helps in finding out the hidden talents and calibre of the employees.
4. Motivated employees means satisfied employees i.e. satisfied in terms of job as well as their personal motives.
5. Motivation reduces the chances of industrial unrest, strikes and similar labour problems.
6. Motivation helps to change the negative or indifferent attitudes of employee to positive attitudes so as to achieve organizational goals.
7. motivation helps to reduce the employee turnover and thereby saves the cost of new recruitment and training.
8. motivation helps in reducing the absenteeism in the organization.

4. Theories of Motivation

A. Maslow's Need Hierarchy Theory:

This is the most well-known theory of motivation of Abraham Maslow, a clinical psychologist. A basic assumption of this model is that as we satisfy one type of need, other needs then occupy our attention.

Once we satisfy our need for food, air and shelter, then we can move on to safety needs, love needs and so on. Although Maslow argued that most people tend to experience these needs in the order that he described, for some people, the so-called higher-level needs will dominate lower-level needs. Some people will be so enthralled by a book or a movie that they will forget they are really hungry. Maslow described the hierarchy of needs as follows:

i. Physiological needs: These refer to physical or biological needs meant for survival and maintenance of life. These include food, clothing, shelter, air, sleep and other basic needs.

ii. Safety needs: Once the physiological needs are satisfied a person aspires for safety needs. These includes security for life, job, protection from environment, animals etc. As a manager, you can account for the safety needs of your employees by providing the safe and secure working conditions, proper compensation (such as a salary) and job security, which is especially important in a bad economy.

iii. Social needs: After the first two needs are satisfied, social needs become important in the need hierarchy. Since man is a social being, he has a need to belong and to be accepted by various groups. It includes need for acceptance, need for belonging, need for love, affection, friendship etc. As a manager, you can account for the social needs of your employees by making sure each of your employees know one another, encouraging cooperative teamwork, being an accessible and kind supervisor and promoting a good work-life balance.

iv. Esteem and status needs: these needs are concerned with self-respect, self-confidence, a feeling of personal worth, feeling of being unique, and recognition. As a manager, you can account for the esteem needs of your employees by offering praise and recognition when the employee does well, and offering promotions and additional responsibility to reflect your belief that they are a valued employee.

v. Self-actualisation needs: Self-actualisation is the need to maximize one's potential whatever it may be. These needs arise only after the four categories of need are fulfilled. These needs are more like mission, lifetime aspiration, e.g., leprosy eradication mission, mission of Mahatma Gandhi to liberate India from British Rule.

Maslow's needs theory has received wide recognition, particularly among practicing managers. This can be attributed to the theory's intuitive logic and ease of understanding. Following are some problems which are not solved by this theory:

a) This theory is common with many other theories also, that there is lack of direct cause-effect relationship between need and behaviour. Thus a particular need may cause behaviour in different ways in different needs.

b) There is another problem in applying the theory into practice. A person tries for his higher-level need when his lower-order need is reasonably satisfied. What is this reasonable level is a question of subjective matter. Thus, the level of satisfaction for particular need may differ from person to person.

B. Theory X and Theory Y: Douglas McGregor has proposed two models i.e., Theory X and Theory Y. Under Theory X, managers believe that employees inherently dislike work and must therefore be directed or even coerced into performing it. In this type of theory, workers generally shirk work and do not like to work. They avoid responsibility and need to be directed. While under theory y , manager assume that employees can view work as being as natural as rest or play and therefore the average person can learn to accept, and even seek responsibility. Good motivation makes workers readily accept responsibility and self-direction.

Comparison between Theory X and Theory Y

Theory X	Theory Y
1. Inherent dislike for work.	Work is natural like rest or play.
2. Unambitious and prefer to be directed by others.	Ambitious and capable of directing their own behaviour.
3. Avoid responsibility.	Accept and seek responsibility under proper conditions.
4. Lack creativity and resist change.	Creativity widely spread.
5. Focus on lower-level (physiological and safety) needs to motivate workers.	Both lower-level and higher-order needs like social, esteem and self-actualisation are sources of motivation.
6. External control and close supervision required to achieve organisational objectives.	Self-direction and self-control.
7. Centralisation of authority and autocratic leadership.	Decentralisation and participation in decision-making. Democratic leadership.
8. People lack self-motivation.	People are self-motivated.

C. Herzberg's Two-Factor Theory: Frederick Herzberg proposed a two-factor theory or the motivator-hygiene theory in 1959. According to Herzberg, there are some job factors that result in satisfaction while there are other job factors that prevent dissatisfaction. According to Herzberg, the opposite of "Satisfaction" is "No satisfaction" and the opposite of "Dissatisfaction" is "No Dissatisfaction".

Herzberg classified these job factors into two categories-

i. Hygiene Factors: Herzberg used the term 'hygiene' to describe factors which are related to the conditions under which job is performed such as compensation, job security, organizational politics, working conditions, quality of leadership, and relationships between supervisors, subordinates, and peers. These factors are extrinsic to work. Hygiene factors are also called as dissatisfiers or maintenance factors as they are required to avoid dissatisfaction. Since any increase in these factors will not affect employee's level of satisfaction, these are of no use for motivating them.

ii. Motivational Factors: According to Herzberg, the hygiene factors cannot be regarded as motivators. The motivational factors yield positive satisfaction. These factors are inherent to work. These factors motivate the employees for a superior performance. These factors are called satisfiers. These are: achievement, recognition, advancement, work itself, possibility of growth and responsibility. Most of these factors are related with job contents. Any increase in these factors will satisfy the employees; however any decrease will not affect their level of satisfaction.

Communication: The English word 'communication' is derived from the Latin communis, which means common sense. The word communication means sharing the same ideas. In other words, the transmission

and interaction of facts, ideas, opinions, feelings or attitudes. Communication is the essence of management. Communication is a two-way process which involves transferring of information or messages from one person or group to another. This process goes on and includes a minimum of one sender and receiver to pass on the messages. These messages can either be any ideas, imagination, emotions, or thoughts. Communication is a Latin word which means “to share”.

Communication Process

Communication is an ongoing process that mainly involves three components namely. sender, message, and recipient. The components involved in the communication process are described below in detail:

1. Sender:

The sender or contact generates the message and transmits it to the recipient. He is the source and the first contact

2. Message:

It is an idea, knowledge, opinion, truth, feeling, etc. produced by the sender and intended for reference.

3. Encoding:

The message produced by the sender is encrypted in a symbolic way such as words, pictures, touches, etc. before transfer.

4. The media:

This is how the coded message is conveyed. The message can be conveyed orally or in writing.

5. Recording:

It is a process of modifying the signals sent by the sender. After recording the message is received by the recipient.

6. Recipient:

You are the last person in the chain and the message you sent was sent. If the recipient receives the message and understands it correctly and acts on the message, only then the purpose of the communication is achieved.

7. Answer:

Once the recipient confirms to the sender that you received the message and understood it, the communication process is complete.

8. Noise:

Refers to any restrictions caused by the sender, message or recipient during the communication process. For example, incorrect telephone connection, incorrect coding, incorrect recording, careless recipient, incorrect understanding of message due to discrimination or inappropriate touch, etc.

Types of Communication

Verbal Communication and Non-Communication

- **Verbal communication:**

Communication occurs through verbal, verbal or written communication that conveys or conveys a message to others is called oral communication. Verbal communication is the use of language to convey information verbally or in sign language. Verbal communication is important because it works well. It can be helpful to support verbal Non-verbal communication Any non-verbal communication, spoken words, conversation and written language is called.

- **Non-verbal communication:**

It occurs with signs, symbols, colors, touches, body or facial features. Insignificant communication is using body language, body language and facial expressions to convey information to others. It can be used both intentionally and deliberately. For example, you may have a smile on your face when you hear an idea or a piece of interesting or exciting information. Open communication is helpful when you are trying to understand the thoughts and feelings of others.

Communication Barriers

One sometimes wants to connect with one thing, but he is actually saying something else that he did not intend. This type of event in communication behaviour is known as the “Arc of Distortion”. The distortion may be the result of some error in any of the communication channels. These barriers to communication are also known as “barriers”.

Some of the barriers to communication:

- Lack of proper style, feedback.
- Content is not related to customer requirements.
- Failure to maintain dual communication.
- Bad weather.
- Lack of horizontal flow of ideas.
- Availability of technical coordinators.
- Semantic Problems.
- Lack of leadership.
- Lack of enthusiasm.
- Lack of support from heads of institutions.

Importance of Communication

1. **Communication Foundation:**

The manager explains to the employees the goals of the organization, the methods of their success and the interpersonal relationships between them. This provides communication between the various staff and departments. Therefore, communication serves as the basis for collaboration in the organization.

2. **Functional:**

The manager coordinates the individual and physical aspects of the organization in order to run it efficiently and effectively. This integration is not possible without proper communication.

3. The Basis for Making Decisions:

Good communication provides information to the manager that helps them make decisions. No decisions could have been made without knowledge. Thus, communication is the basis for making the right decisions.

4. Improves Management Ability:

The manager transfers targets and issues instructions and assigns tasks to subordinates. All of these factors are involved.

The Importance of Communication Can Be Briefed As Follows

- Good communication encourages motivational skills.
- It is a mode of information in the decision-making process.
- Communication emphasises socialising within or outside the organisational structure.
- It helps in controlling the process. Employees have to follow the organisation rule, code of conduct and other company policies.
