PAGE NO.: 10

Q1. in which years was in zones the diff. bet. the appeared candidate and Qualif.

Q. Study the given table carefully and answer that follows -
→ No. of candidates appeared and qualified for a test (in hundreds) in 6 different years from 5 different zones.

Note:- Here APP. means Appeared & Qual. means qualified.

Year	P		Q		R		S		T	
	APP.	Qual.	APP.	Qual.	APP.	Qual.	APP.	Qual.	APP.	Qual.
2005	3.2	2.5	3.5	1.4	3.8	2.2	4.2	2.4	6.2	2.6
2006	4.6	3.4	6.9	4.2	6.9	4.4	7.4	3.3	6.2	4.8
2007	6.5	4.9	7.7	4.5	5.9	4.8	8.3	5.6	6.4	4.2
2008	7.4	5.7	5.4	3.4	7.2	3.2	9.3	6.4	7.8	6.2
2009	8.8	4.8	6.6	5.2	8.6	6.8	11.4	5.2	9.9	6.9
2010	9.2	5.6	10.6	6.4	10.3	7.4	14.2	11.4	11.8	9.4

Q1. in which years was in zones the difference between the appeared candidates and qualified candidates the second lowest?

(A) 2005 (B) 2006 (C) 2007 (D) 2008

Sol. in zone S, the diff. bet. the appeared candidates and the qualified candidates in various year is given below.

$$2005 \rightarrow (4.2 - 2.4) = 1.8 \quad \text{--- 1st lower}$$

$$2006 \rightarrow (7.4 - 3.3) = 4.1$$

$$2007 \rightarrow (8.3 - 5.6) = 2.7 \quad \text{--- 2nd lower}$$

$$2008 \rightarrow (9.3 - 6.4) = 2.9$$

$$2009 \rightarrow (11.4 - 5.2) = 6.2$$

$$2010 \rightarrow (14.2 - 11.4) = 2.8$$

So Ans = 2007 --- (C)

Q2

The no. of Candidates who qualified the test from zone R in the year 2010 was approximately what percentage of the no. of Candidates who appeared from zone Q in the 2008?

- (a) 132 (b) 137 (c) 142 (d) 152

Solⁿ

in 2010, the qualified candidate from zone R = 7.4
in 2008, the appeared candidate from zone Q = 5.4

Required Percentage

$$= \frac{7.4}{5.4} \times 100$$

27 Solⁿ

$$= \frac{3700}{27} = 137.03\% = 137\%$$

— (b)

Q3

What was the average no. of Candidates appeared from zone T over all the years together?

- (a) 805 (b) 810 (c) 820 (d) 830

Solⁿ

Average no. of Candidates appeared from T all over the years.

$$= \frac{(6.2 + 6.2 + 6.4 + 7.8 + 9.9 + 11.8)}{6} \times 100$$

$$= \frac{48.3 \times 100}{6}$$

$$= 8.05 \times 100$$

$$= 805$$

— (a)

Q4.

What was the ratio of the number of Candidate app. from zone P in the year 2005 to the no. of Candidate qual. from zone S in the year 2007?

(a) 4:1

(b) 4:3

(c) 4:7

Solⁿ

No. of app. candidate from zone P in 2005 = 3.2

No. of Qual. Candidate from zone S in 2007 = 5.6

So,

$$\text{Required ratio} = \frac{3.2}{5.6}$$

$$= \frac{32}{56}$$

$$= \frac{4}{7}$$

$$= 4:7$$

— (C)

The end
